

Big IPO Runups of 1975-December 2004

The following is a listing of all the firm commitment initial public offerings (IPOs) of common stock (excluding unit offerings, and with an offer price of more than \$5.00 and proceeds of more than \$5 million) of non-ADR operating companies during 1975-2004 that doubled in price on the first day of trading. The number of shares offered includes the domestic and global tranches, but excludes overallotment options, if any. Offer prices with an * are the original offer price, but the stock has subsequently undergone at least one split, as listed in the footnotes below. The number of shares offered has not been adjusted for splits, either.

The ten biggest first-day percentage increases are: the Va Linux 12/09/99 697.50%, Globe.com 11/13/98 606%, Foundry Networks 9/28/99 525%, Webmethods 2/11/00 507.50%, Free Markets 12/10/99 483.33%, Cobalt Networks 11/05/99 482%, MarketWatch.com 1/15/99 474%, Akamai Technologies 10/29/99 458%, Cacheflow 11/19/99 426.56% and Sycamore Networks 10/22/99 386%.

Note: Prior to 1997, the main source for offer dates is the Securities Data Co. new issues database. This lists the date of the prospectus, which is sometimes the day before trading started. Starting in 1998, I have been updating this list on a daily basis, and the offer dates correspond to the first day of trading, rather than the date listed on the prospectus. In 1999, 117 IPOs doubled on their first day. This compares with 39 during the previous 24 years combined. In 2000, 77 more IPOs doubled on the first day, although only one of these was in the fourth quarter. Since November 2000, no IPOs with an offer price of more than \$5.00 have doubled on the first day, although On April 6, 2004, Jed Oil went public at \$5.00 and closed at \$11.20 on the American Stock Exchange.
