Course Structure

This course will be delivered entirely online through the University of Florida's course management system, Canvas. In Canvas, you will access video lectures, course materials, course case studies and additional resources. Activities will consist of watching lectures, discussion posts, weekly office hour via Zoom, and assignments with various case studies.

Active participation with the discussion forums and assignments is incredibly important to your success in the course. The discussion forums provide an opportunity for you to engage with your course colleagues as well as the PURC faculty on the course material. Posting in the discussion forums and submission of module assignments is required in order to receive the Certificate of Completion.

This is NOT a self-paced course. The course will be delivered online over a six week period, November 1 – December 10, 2021. A new learning module will be released every Monday by 12pm Eastern Standard Time. It is recommended that participants complete the module by the following Sunday (one-week). All course work must be completed no later than Friday, December 17, 2021 in order to receive the Certificate of Completion.

Comprehensive Regulatory Impact Analysis

Course Requirements

- Internet connection (DSL, LAN, or cable connection desirable)
- Chrome is the recommended web browser for Canvas. Internet Explorer and Safari should NOT be used to access Canvas.
- Access to course management system, Canvas.
